Summary

" As a passionate second-year student pursuing a Bachelor's in Computer Science and Engineering (CSE) at SRM, I am dedicated to honing my technical skills and striving for excellence in the world of technology.

My journey in the field of CSE has been an exciting blend of learning, exploration, and innovation. I'm constantly seeking opportunities to expand my knowledge, whether it's through challenging coursework, hands-on projects, or involvement in coding competitions.

My interests are deeply rooted in the core aspects of CSE, and I'm keen on delving into topics like algorithms, data structures, artificial intelligence, and software development. I believe that these are the building blocks of a rapidly evolving digital world.

Alongside my academic pursuits, I'm an advocate for practical experience. I'm currently exploring internships, projects, and hackathons to apply my theoretical knowledge in real-world scenarios.

I'm always open to connecting with fellow students, professionals, and anyone who shares a passion for technology. Let's connect, collaborate, and inspire each other on this incredible journey.

Looking forward to new connections and opportunities that will help me grow as a CSE enthusiast. Feel free to reach out, and let's explore the endless possibilities of technology together. "

Education

SRM University

2022 - 2026

Licenses & Certifications

Android Developer Virtual Internship - AICTE NEAT

National Workshop on Data Analytics and Machine Learning - SRM University

Skills

Data Analysis • Machine Learning • Artificial Intelligence (AI) • Android Development • Kotlin • Android Studio • Web Development • Python (Programming Language) • C++ • C (Programming Language)
